

FOR FAMILIES AT YOUR SCHOOL

Coding and Math, **Free to Start**

Three free things you can start tonight

1 **Beginner Python** Grade 4 and up · coding

Six self-paced lessons that run in the browser: print, numbers, decisions, loops, lists and a first game. Every lesson has challenges that check themselves. Free with a free account.

2 **Online Math Sample Tests** Math 1 to Algebra 2

Ten problems for the grade or course, solved online and checked on the page. Try again or see a short explanation, and get the score by email.

3 **Free Placement Assessment** Kindergarten to Pre-Calculus

Thirty minutes online with one of our educators. A written result and the course and level that fit your child, with no obligation.

Want a teacher every week?

Live, interactive online classes from Avatar Learning Center: math from Kindergarten to Pre-Calculus, and coding in Python and Java. Small groups, usually 5 to 6 students and never more than 8, with three levels in every grade. Founded in 2020 by four women scientists with PhDs.
